AMENDMENT NO. 5 JANUARY 2018
TO
IS 13428 : 2005 PACKAGED NATURAL MINERAL WATER — SPECIFICATION

(Second Revision)

(*Page* 20, *clause* **D-7**) — Substitute the following for the existing clause:

'**D-7** Pass 250 ml or as appropriate quantity of water sample through a 0.45 micron membrane filter; the membrane is inoculated into concentrated Asparine Proline broth medium (D4).

Incubate the medium at 37°C ± 1°C for 48 h. Examine for growth and fluorescence under an ultraviolet lamp in either a darkened room or apparatus designed to exclude visible light.

NOTE — The membrane filtration technique outlined in IS 15188 may be used to pass the sample of water to be tested through membrane before the test.'

(*Page* 20, *clause* **D-9**, *Title*) — Substitute the following for the existing title:'

'**D-9 DETECTION**'

(FAD 14)
